Smart Security

Specialized Services
based on Ai

SOLUTIONS

Smart Security Drone

With **Artificial Intelligence**, field surveillance becomes faster and data transfer takes place in real time.

We offer you a complete cloud-enabled drone autopilot system and its application in field surveillance with uninterrupted operation under all conditions.

Vulnerability Assessment

we assess and analyze the vulnerability and risk threat associated with a specific location. Threats are identified and our expert team plans prevention and response to protect critical infrastructure by proposing customized solutions.

Cloud Ai Platform

Remote Surveillance

Artificial Intelligence combined with an intelligent networked surveillance system conveys detailed information to the operator at the Imaging Center for proper, timely and efficient incident management.

Image Center - Incident MGT

A modern cloud platform combined with a high-tech cloud computing network and algorithms at the edge recording a live image with the possibility of playback and analysis at any time.

Cloud Ai Platform

Scale to unlimited locations,
cameras, and users

Access any camera and
stream in real time

Turn video output into
actionable data with
Automatic alerts

Enable / disable Ai
algorithms based on needs

Create custom patterns to
undertake Situational
Awareness

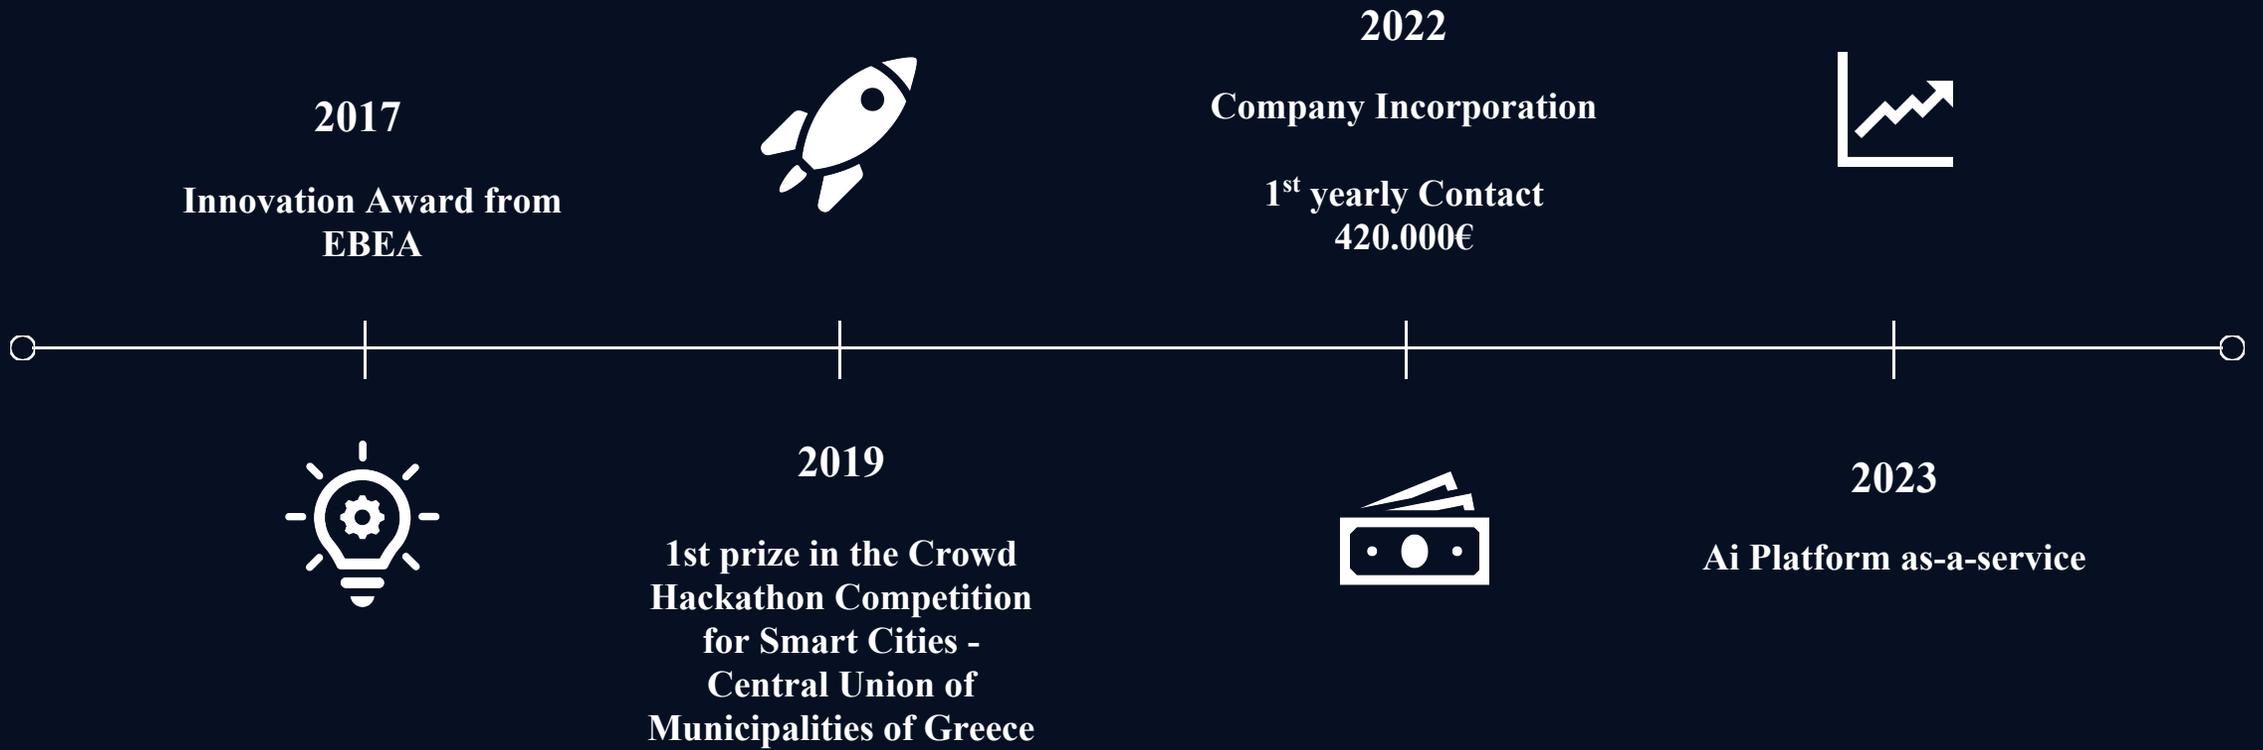

Manage Your Business
Anywhere, Anytime, on Any
Device
